

## **Assignment –2**

### **Introducing Relational Databases.**

**1) Which field of the Customers table is the primary key?**

Ans: The primary key is the CNUM field, as it uniquely identifies each customer in the table.

**2) What is the 4th column of the Customers table?**

Ans: The 4th column is RATING, which is of type int(4).

**3) What is another word for row? For column?**

Ans: Another word for row is record or tuple and for column is field or attribute.

**4) Why isn't it possible to see the first five rows of a table?**

Ans: Relational databases store rows without any guaranteed physical or logical order.
